

GROUP 8

DEGREE **AUDIT** ++

Prepared by Sara Caponi, Jamie Flores, Daniel Jaegers,
Derek Rogers, Erika Eckfeld, Kate Gardner, Sohaila Bakr

PROJECT DESCRIPTION

DegreeAudit++

We are trying to improve an existing tool that is now offered through the University of Missouri, Degree Audit. The degree audit is a report reflecting a student's academic progress toward the completion of a program of study (degree, minor, certificate, etc.).

Our goal is to focus on the degree audit for a Bachelors of Science in Computer Science, and then add other majors offered at the University of Missouri – Columbia.

Typical customers for DegreeAudit++ will be students who are planning for their continuing semesters at the University. This program will also help advisors quickly see what courses students have already taken and what courses they need to take.

LIVE DEMONSTRATION

DegreeAudit++ in Action

Features/Functions to expect:

- User Login Implementation
- Advisor Search
- Clean Table Views
- Table Sorting
- Collapsible Data

**Graduation
Date**

**Focus On Design
& User Experience**

**Suggest
Classes**

**GPA
Calculator**

**Add Information
to Database**

Future Plans

Our plans for the rest of the semester

THANK YOU
